

ARAVINTHAN SEDHURAMAN

PYTHON BACKEND DEVELOPER

Pudhukottai, Tamilnadu • +91 9952183926 • aravintharavinth7746@gmail.com

PROFILE SUMMARY

Software developer specializing in Python backend development and React frontend engineering, with experience building scalable, secure web applications and RESTful APIs. Skilled in full-cycle development including system design, API integration, database optimization, and deployment. Passionate about clean code, performance optimization, and collaborative problem-solving.

SKILL SUMMARY

Frameworks: Django, Fast API, Django REST Framework, React.

Programming Languages: Python, JavaScript

Databases: My SQL, MongoDB

Web Technologies: HTML, CSS, Tailwind CSS, Bootstrap

Design Tools: Figma

Version Control & DevOps: GitHub, Docker,

WORK EXPERIENCE

Junior Software Developer – Tandam Digital Solutions -Chennai **August 2025 - Present**

- Developed scalable backend APIs using Django and FastAPI for enterprise web applications.
- Designed and optimized MySQL stored procedures for high-performance data processing.
- Worked with microservices-based backend components and REST APIs.
- Contributed to system architecture, feature development, and performance optimization.
- Handled end-to-end API development, debugging, and deployment in a cross-functional team.

Python Fullstack Developer, Ec4You Digital Marketing-Chennai **July 2023 - July 2025**

- Built secure RESTful APIs using Django and Django REST Framework.
 - Developed responsive user interfaces using React.
 - Designed and optimized MySQL and MongoDB databases for performance and reliability.
 - Integrated frontend with backend services using Axios/Fetch for asynchronous communication.
 - Delivered dynamic, user-focused web platforms through strong team collaboration.
-

EDUCATION

- **Bachelor of Computer Applications (BCA) – 78%**
AVVM Sri Pushpam College, Thanjavur (2019 – 2022)

PROJECTS

Corporate Share & Compliance Management System

Tech Stack: Python, FastAPI, MySQL (Stored Procedures), React, Bootstrap

- Architected a scalable FastAPI backend to manage corporate shareholding data and statutory compliance workflows.
 - Developed RESTful APIs for corporate actions, compliance events, and document generation.
 - Designed optimized MySQL stored procedures for high-volume transactional operations.
 - Integrated frontend with backend APIs using async request handling.
 - Ensured data integrity, performance, and modular system design.
-

E-Commerce Website

Tech Stack: Django, JavaScript, MySQL, Bootstrap, HTML5, CSS3

- Developed backend services for product management, cart, orders, and checkout workflows.
 - Integrated Razorpay payment gateway and Shiprocket for shipping and order tracking.
 - Implemented secure transaction validation and order processing logic.
 - Added features like returns, wishlist, and real-time order tracking.
 - Optimized database queries and API performance, improving application speed by 305%.
-

Automotive Business Website

Tech Stack: Django, React, MySQL, HTML 5, Tailwind CSS

- Built a scalable backend architecture using Django and REST APIs.
- Implemented secure enquiry and contact form handling with server-side validation.
- Designed RESTful APIs for dynamic content management.
- Optimized MySQL queries and API response time, reducing latency by 40%..
